

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

THIS volume attempts to fill a vacant place. Twelve years have elapsed since the Standard Index to the Statutes was compiled, and the need of some ready means of referring to and conveniently using the mass of legislation which has come into force during the intermediate period has been experienced for some time past.

The compiler does not suggest that his work covers the whole ground of detail over which an elaborate and systematic analysis of each Act would extend, but simply asserts that it is, as its title page sets out, a convenient Index to the Statutes themselves.

The Index consists of two parts, which, though in form distinct sections, are intended to be used in combination.

Part I. is a Chronological Table divided into two sub-sections :—

- (a) Public General Acts in force at the date of the publication of "Oliver's Statutes" and subsequently affected by legislation.
- (b) Public General Acts passed since the publication of "Oliver's Statutes."

Sub-section (a) gives in proper sequence the Imperial and Local Acts which have been repealed or amended since the publication of "Oliver's Statutes." In many cases repeals and amendments have been made of Acts not referred to in that collection, and these are also included in the list. In the majority of cases, however, the Acts affected are contained in the volumes in question, and in each such case reference is made to the page at which the Statute will be found. In this way any person desiring to eliminate the legislation no longer in force from his set of Statutes can speedily do so by ruling out the Acts marked repealed and by referring to the Acts which amend those partly in force and noting the extent of the changes there stated. It may be well to note also that in this sub-section are included the Acts contained in the Appendix to "Oliver's Statutes" and passed during the publication of that work; but to the extent that these Acts may be amending Statutes, they are treated as having been published since "Oliver's Statutes."

Sub-section (b) contains a complete list of all the public Acts passed since 1879 (43 Vic. No. 9), bringing the legislation up to the commencement of the present year, and showing the repeals and amendments which have been made from time to time in the legislation embraced within that period. It will thus be seen that the Table not only presents a complete record of all the public legislation since the compilation of "Oliver's Statutes," but wherever an Act appearing in that collection has been repealed or amended, the effect of such appeal or amendment is recorded.

Part II. is a Subject Index, grouping the substantive matter of the Statutes under convenient heads. It does not attempt a detailed analysis, but gives the general scope of each Statute, not by a mechanical reference to "short titles," but having regard to the whole subject matter.

It consequently happens that one Act will be found indexed under two or more different heads where its contents necessitate it being so dealt with. Where any of the Statutes thus indexed have been amended, the fact of such amendment is indicated by an asterisk, and reference to the Statute so noted will direct the inquirer to the Amending Act.

Take for an example of the working of the Table and Index the three Acts which follow one another in "Oliver's Statutes," commencing at p. 658, viz., 15 Vic. No. 8, 19 Vic. No. 1, and 11 Vic. No. 13. It is important to anyone using that work to know whether those Statutes still stand unchanged as part of the law of the land. A reference to the Chronological List will show that the first was repealed by 54 Vic. No. 25, and the third amended by 50 Vic. No. 26. The absence of the second from the list of repealed or amended Statutes shows that it has not been affected by any subsequent legislation. Again, it will be noticed that where 11 Vic. No. 13 occurs in the Subject Index under the heading "Defamation," an asterisk is prefixed to show that some dealing with the Act is noted in the Chronological List.

In conclusion, it is only necessary to say that every care has been taken to secure accuracy in the Table and Index, and the compiler here desires to express the obligation he is under to his friend Mr. David Ferguson for many valuable suggestions with regard to the scope of the compilation, and his co-operation in its execution and revision.
